

KIEL JOSHUA P. LOZADA

Computer Engineer | ISC2 Certified in Cybersecurity (CC) | kiel-portfolio-mu.vercel.app

Santa Maria, Bulacan | 0929-106-4439 | kieljoshua28@gmail.com | www.linkedin.com/in/lozada-kiel-joshua-p-886704316

PROFESSIONAL SUMMARY

Fresh graduate and ISC2 CC-certified professional with fundamental knowledge of cybersecurity operations, threat detection, and incident response. Committed to continuous learning and mentorship in entry-level opportunities in IT support. Cybersecurity and Software Development.

CORE COMPETENCIES

Security Tools & Technologies: SIEM log analysis, threat detection, alert triage, incident response procedures

Threat Detection & Analysis: Nessus scanning, CVE/CWE analysis, risk prioritization, NMAP reconnaissance, packet analysis (Wireshark), network troubleshooting

Infrastructure & Networking: TCP/IP, OSI model, Subnetting (basic), Network troubleshooting, Active Directory (basic), VMware, VirtualBox, Kali Linux, Metasploitable

Systems & Platforms: Windows/Linux administration, PowerShell, Pentesterlab, JIRA, Arduino/IoT devices, Cyberchef, Postman,

Programming: Python, C, C++, C#, SQL (basic), JavaScript, HTML/CSS, AI (Claude, Chatgpt, Gemini), React/Node.js (studying), Vite

Soft Skills: User Support, Problem Solving, Time Management, Communication, Teamwork, Work under pressure

CERTIFICATIONS & CREDENTIALS

- ISC2 CC — Certified in Cybersecurity | Cisco Networking Academy — Python Essentials, HTML Essentials, CSS Essentials
- Appkademiya – Netops Certified Engineer (NTO – 101) | CyberExam – GRC Fundamentals | AWS Skill Builder - AWS Cloud Practitioner Essentials (ongoing)

WORK EXPERIENCE

Quality Assurance Analyst Intern | Hooli Software Inc. | Hybrid

Jul – Sep 2025 (300 hrs)

- Tested 500+ software defects for security implications (authentication, data validation)
- Identified functional and reliability issues in production applications (Microsoft Compass Dashboard, Swolest Website)
- Responsible for the testing phase of the product process to ensure that final products meet the company standard
- Utilized Postman for REST API validation, endpoint debugging, and security token verification across testing phases of web applications.

IT Staff Intern | City Government of San Jose Del Monte, Bulacan

Jul – Sep 2024 (300 hrs)

- Provided first level technical support to 30+ office staff, resolving hardware, networking and connectivity issues
- Managed and analyzed operational data in Microsoft Excel, maintaining data integrity and creating reports
- Served as primary contact for office visitors and staff, routing technical issues efficiently and maintaining clear communication

HANDS-ON PROJECTS

Home Lab/University — Network Vulnerability Assessment & Detection Lab

- Architected multi-VM lab environment using VMware/VirtualBox with Kali Linux and Metasploitable to simulate real-world SOC scenarios
- Performed network reconnaissance (NMAP), identified 100+ active services and open ports, mapped findings to potential vulnerabilities
- Conducted vulnerability assessments (Nessus), prioritized findings by CVSS score, documented remediation strategies aligned to risk levels
- Simulated incident detection: analyzed suspicious logs, identified indicators of compromise (IOC), practiced alert investigation procedures

VitalSense — An IOT Based Real Time Health Monitoring for Heart Rate, Oxygen Levels and Body Temperature - Thesis Project

- Engineered secure IoT healthcare device with integrated monitoring dashboard deployed in clinic environment
- Implemented data security protocols for sensitive patient health metrics (heart rate, oxygen levels, body temperature)
- Designed secure intranet architecture to protect patient data confidentiality and system integrity.

EDUCATION

Bachelor of Science in Computer Engineering

Polytechnic University of the Philippines — Santa Maria Bulacan Campus | Fresh Graduate (September 9, 2026)

Honors: Consistent Dean's Lister & President's Lister | Cum Laude

Achievements (Cybersecurity): 1st Place CTF Competition (4th Year) | 2nd Place — CTF Competition (3rd Year)

Security Labs & Training:

Tryhackme: | 30+ SOC Analyst training rooms completed (Threat Detection, Incident Response) | <https://tryhackme.com/p/BASIC28>

Github: <https://github.com/kieljoshua28>

linux journey: | for studying Linux administration, bash scripting proficiency, user management | <https://labex.io/u/lozada-kiel-joshua-p-73066224>

freecodecamp: (Python and API (studying))

AWS Skill Builder: Cloud (Studying)
